

**LEGEND**

To obtain more detailed information in areas where Base Flood Elevations (BFEs) and/or floodways have been determined, users are encouraged to consult the Flood Profiles and Floodway Data Tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations and therefore may not exactly reflect the flood elevation data presented in the FIS. For construction and/or floodplain management purposes, users are encouraged to use the flood elevation data presented in this FIS in conjunction with the data shown on the FIRM.

Elevation Reference Marks (ERM) elevations listed on this map were obtained and/or developed to establish vertical control for determination of flood elevations and floodplain boundaries portrayed on this map. Users should be aware that these ERM elevations may have changed since the publication of this map. To obtain up-to-date elevation information on National Geodetic Survey (NGS) ERMs shown on this map, please contact the Information Services Branch of the NGS at (301) 713-3342, or visit their website at [www.ngs.noaa.gov](http://www.ngs.noaa.gov). Map users should seek verification of non-NGS ERM measurement elevations when using these elevations for construction or floodplain management purposes.

Coastal BFEs shown on this map apply only to landward of 0.7 National Geodetic Vertical Datum (NGVD). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Stillwater Elevations table in the Flood Insurance Study report for this community. Elevations shown in the Summary of Stillwater Elevations table should be used for construction, and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

**ELEVATION REFERENCE MARKS**

REFERENCE MARK	ELEVATION (FT. NGVD)	DESCRIPTION OF LOCATION
RM5**	8.238	A U.S. Geological Survey disk, stamped FOURTEEN 1959, set in concrete on the north side levee of Fourteen Mile Slough, approximately 100 feet east of Plymouth Road.
RM6	-8.848	A U.S. Geological Survey disk, stamped CALA 1959, set in a concrete post, 0.8 foot underground, 14 feet southeast of Power Pole No. 319 and 70 feet southeast of a large walnut tree south of Brookside Road, approximately 500 feet east of Interstate Highway 5.
RM7	12.228	A U.S. Geological Survey disk, stamped DEEP 1959, set in a concrete post at a 200-foot steel tower south of the intersection of Acacia and Fremont Streets.

\*\*LOCATED IN AREA NOT INCLUDED

- LEGEND**
- SPECIAL FLOOD HAZARD AREAS INUNDATED BY 100-YEAR FLOOD
  - ZONE A** No base flood elevations determined.
  - ZONE AE** Base flood elevations determined.
  - ZONE AH** Flood depths of 1 to 3 feet (usually area of ponding); base flood elevations determined.
  - ZONE AO** Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined; for areas of alluvial fan flooding, velocities also determined.
  - ZONE A99** To be protected from 100-year flood by Federal flood protection system under construction; no base flood elevations determined.
  - ZONE V** Coastal flood with velocity hazard (wave action); base flood elevations determined.
  - ZONE VE** Coastal flood with velocity hazard (wave action); base flood elevations determined.
  - FLOODWAY AREAS IN ZONE AE
  - OTHER FLOOD AREAS
  - ZONE X** Areas of 500-year flood; areas of 100-year flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 100-year flood.
  - OTHER AREAS
  - ZONE X** Areas determined to be outside 500-year floodplain.
  - ZONE D** Areas in which flood hazards are undetermined.
  - UNDEVELOPED COASTAL BARRIERS:**
    - Identified 1983
    - Identified 1990
    - Other Areas
  - Coastal barrier areas normally located within or adjacent to special flood hazard areas.
  - Floodplain Boundary
  - Floodway Boundary
  - Zone D Boundary
  - Boundary Dividing Special Flood Hazard Zones and Boundary Dividing Areas of Different Coastal Base Flood Elevations Within Special Flood Hazard Zones.
  - Base Flood Elevation Line; Elevation in Feet\*
  - Cross Section Line
  - Elevation Reference Mark
  - River Mile
  - \*Referenced to the National Geodetic Vertical Datum of 1929

**NOTES**

This map is for use in administering the National Flood Insurance Program; it does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size, or all electronic barriers outside Special Flood Hazard Areas. The community map repository should be consulted for more detailed data on BFEs, and for any information on floodway designations, prior to use of this map for property purchase or construction purposes.

Areas of Special Flood Hazard (100-year flood) include Zones A, AE, A1-A30, AH, AO, A99, V, VE and V1-V30.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show to scale. Refer to Floodway Data Tables where floodway widths are shown at 1/200 inch.

Corporate limits shown are current as of the date of this map. The user should contact appropriate community officials to determine if corporate limits have changed subsequent to the issuance of this map.

For changing panels, see separately printed Map Index.

**MAP REPOSITORY**  
City of Stockton  
City of Stockton Community Development Dept. 345  
North El Dorado, Stockton, CA 95202  
(Maps available for reference only, not for distribution.)

**INITIAL IDENTIFICATION:**  
FEBRUARY 22, 1974

**FLOOD HAZARD BOUNDARY MAP REVISION:**  
JANUARY 7, 1977

**FLOOD INSURANCE RATE MAP EFFECTIVE:**  
JANUARY 3, 1979

**FLOOD INSURANCE RATE MAP REVISIONS:**  
FEBRUARY 8, 1983  
FEBRUARY 4, 1988

Map revised April 2, 2002 to update corporate limits, to change base flood elevations, to add special flood hazard areas, to change special flood hazard areas, to change zone designations, to add roads and road names, to reflect updated topographic information, to incorporate previously issued letter of map amendment, and to change floodway.

To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program at (800) 638-6633.
